A Simple Presentation

Martino Ferrari

Introduction

The results will be presented in equation (1)
Formula

Some equation:

$$f(x) = \sum_{i=0}^{n} x^{-i} \tag{1}$$

where $x \in \mathbb{R}$ is the independent variable and $n \in \mathbb{N}$ is a constant.

Result

Figure 1. approximation of equation 1 with $n = 3$

Table

Column A.	Column B.
Element A.1	Element B.1
Element A.2	Element B.2
Element A.3	Element B.3
Element A.4	Element B.4

Conclusion

As shown in figure 1 the output is cool
